Office Action Summary	Application No. 10/718,676	Applicant(s) YAMAUCHI, TAISUKE	
	Examiner Kevin Quarterman	Art Unit 2879	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 14-21, drawn to a display apparatus, classified in class 313, subclass 506.
 - II. Claims 12-13, drawn to a method of manufacturing a display apparatus, classified in class 445, subclass 24.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the display apparatus can be made by providing a substrate; forming a first electrode on the substrate by photolithography; forming a light-emitting layer by vapor deposition on the first electrode; forming a second electrode by sputtering on the light-emitting layer; forming a bank as an angle changer at a periphery of the light-emitting layer that projects on the emitting side to separate the light-emitting layer from other light-emitting layer; forming a protective layer by printing that covers an emitting side of the light-emitting layer and has a thickness that allows the light emitted from the light-emitting layer to undergo total reflection at least once at an interface in an area of the corresponding light-emitting layer; and

Art Unit: 2879

forming a reflective layer that covers an opposite side, as viewed from the light-emitting layer, of the protective layer.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
